Lightroom, an Adobe application, does a good job of organizing images for editing, such as for creating slideshows. Photography Photography is the process of using a camera and then altering the image on a computer by using the programs included with the camera or the computer. Photoshop is the standard for manipulating images (among other programs), making it an important tool for photographers who want to work in the digital arena. If you look at a typical camera and/or computer, you'll see that the computer takes pictures and the camera modifies images after they are stored on the computer. Photography is a favorite hobby of mine, although I'm not a professional photographer. I take many pictures as I'm traveling, but I also shoot photos around my house for quick family pictures. I also buy a few new cameras for special occasions. As you get to know your digital camera, you'll learn ways to improve the quality of your photos. This section introduces you to Photoshop's most important functions for correcting and enhancing images. You also discover how to create a photo collage and make a photo album using Photoshop. Working with a camera Before you can start working with Photoshop, you need to first figure out how to use the camera or computer, which takes the pictures and analyzes and improves them before they're saved on the computer. If you have an in-camera exposure and digital image analysis system such as a D3200, it's a good idea to familiarize yourself with your camera's functions; the D3200 is covered in Chapter 5. You can also find instructions for using the camera on this book's companion website at `www.dummies.com/go/photoshopphotoshoppingkit`. Exploring the three basic tools Photoshop has three types of tools: tools that you create directly, tools that run automatically (or semi-automatically), and tools that you activate with a mouse. Here are the types of tools that are most useful to a photographer: Actions (see Figure 7-1): Actions are preset commands (or the commands you want to use most often) that come from third-party developers. These developers write programs that can automate certain tasks, such as developing an entire sequence of photos. Actions are available only as part of Photoshop, and they're written for specific cameras. Photoshop Brushes (see Figure 7-2): Photoshop Brushes are sets of pre-made paint

You may not be aware that Photoshop is much more than just a paint program. It is actually a program for all aspects of graphic design, such as cutting out a painting from a canvas, cutting a photo into a collage or arranging the colors in a photo to create a high-end print. Photoshop Elements is a good choice for anyone who wants to use Photoshop for those simple tasks. While it is not the same as professional software, it is very helpful for those with limited graphics skills. This article will teach you the basic features of Photoshop and how to use them to create professional-quality images. Photoshop Tutorial: One-Click Photo Editing - Step by Step This Photoshop tutorial is perfect for beginners who want to know how to use the program or for the person who always has multiple projects on the go. It is important to note that not all of the actions described here will work the same way in Elements as they do in Photoshop. However, most of them will give the same or similar result. 1. Open the images you want to edit Go to the Photoshop Elements document, which is located in your folder. Open the image you want to edit by right-clicking on it and selecting "Open with Adobe Photoshop Elements". The image should open in the application. 2. Open the Layers palette On the left side of the window, click on the icon that looks like a pencil in a box. This is called the Layers palette, or Layers panel. You will find that you are now in a drop-down window, which can be used to make changes to layers. You can perform several tasks on layers, but for the purposes of this tutorial, we will make a few changes. 3. Add a new layer Click the small gray box that is labeled Add Layer above the layers palette. This is where you can make changes to each image. 4. Create a new layer Add a new layer on top of the layer you just created by clicking on the small gray box that is located directly below the layer thumbnail. You should now have three layers on the canvas: the first layer you created, your new layer and the original image. 5. Duplicate the layer Click the small gray box that is located next to your original layer to duplicate it. Now 388ed7b0c7

In the end it was a mistake that helped the Blackhawks finish with the best record in the West. Thomas Vanek scored with 8.9 seconds left in overtime to give the Islanders a 3-2 victory over the Hawks in a wild game Friday night at the Coliseum. Vanek, who scored on a two-on-one opportunity with 6:09 left in the third period, had one goal for the Islanders and two assists. Radek Dvorak and Ruslan Salei also scored for the Islanders, who have won five in a row. Frans Nielsen had two goals and an assist. Dvorak scored a power-play goal with 7:10 remaining in regulation to pull the Hawks to 2-2, forcing overtime in an entertaining game. But Vanek's winning goal came on a two-on-one for the Islanders, a team without a winning record during its six-game winning streak. "I think that was the difference in the game," Vanek said. "When we got on the power play in the last minute of the third period, it was a huge goal that got us going and gave us momentum. We were able to keep our poise and get the two points." The teams combined for 34 shots on goal, and the winning goal came on a power play. "It was a crazy game," said defenseman Brian Campbell, who had a goal and two assists for the Hawks. "We have a tough time with overtime games like that. You're battling, getting back on your feet a little bit and when a guy like Vanek does that you give him everything you have. He really took his time and made a great play." John Scott scored a power-play goal with 49 seconds left in regulation to give the Hawks a 2-1 lead, but Vanek tied the game with 3:12 left in the third period. Vanek threw a pass to Ryan Stoa, who skated around the Islanders defense and backhanded the puck past Roloson for his third goal. Then it was Nielsen's turn, as he scored on the Islanders' first power play of the game in the final minute of the third period. The Dane had one goal and two assists in the Hawks' 4-3 win at the Islanders on Tuesday. Hawks forward Marian Hossa had an assist on
